CAREER OBJECTIVE

Motivated AIML student skilled in Machine Learning, NLP, SQL, Excel, and Power BI. Seeking an internship to apply analytical skills, gain practical experience, and contribute to AI and data-driven projects while continuously learning and growing.

EDUCATION

Bachelor of technology - Artificial Intelligence & Machine Learning | 2023-2027

CMR university, Bengaluru.

CGPA: 9.2 (until 5th sem).

Pre university- MPC stream | 2021-2023

Narayana junior college, Tirupati

Percentage:97%

Class X | 2020-2021

Chaitanya Children's Academy, Andhra Pradesh

Percentage:98%

PROJECTS

Comment toxicity severity ranking: Python, ML, NLP, Scikit-learn, Pandas, NumPy, NLTK, GitHub.

Developed a machine learning-based system to classify and rank online comments based on toxicity severity levels. Utilized NLP techniques for text preprocessing and classification, enabling efficient identification and prioritization of harmful content for moderation.

Resume based management system:HTML, CSS, JS, Node.js, SQL, Database Management, CRUD Operations, REST APIs, Git/GitHub

Developed a Resume Management System to store, manage, and retrieve candidate resume information efficiently. Implemented CRUD operations with a user-friendly interface and database integration for seamless resume management.

AirSense AI:Python, Machine Learning, Pandas, NumPy, Scikit-learn, Data Visualization.

Developed an AI-powered air quality monitoring and prediction system that analyzes environmental data to assess pollution levels and forecast air quality trends. Leveraged machine learning techniques to generate insights for environmental monitoring and decision-making.

TECHNICAL SKILLS:

Programming: Python, SQL, C

AI/ML: Machine Learning, NLP, Deep Learning, Computer Vision

Data Analytics: Excel, Power BI, Data Visualization

Tools: Git, GitHub, Jupyter Notebook, Scikit-learn, Pandas, NumPy

SOFT SKILLS

- Problem Solving
- Team Collaboration.
- Team Management.
- Communication skills

ACHIEVEMENTS

- Participated in the training session conducted by **Edunet foundation** as skills for future and worked on the project **Air sense AI** which predicts the real time air quality of different cities
- Represented the **ResQ** Project during the college NAAC assessment, contributing to institutional innovation recognition.
- Actively participated in multiple inter-college coding,AI challenges, gaining exposure to competitive environments and enhancing practical skills. Secured 2nd Place in a Hackathon at **Aurora Tech Fest 2024**, showcasing problem-solving and technical skills.
- Shortlisted for **CAUSE 2025** innovation Challenge as one of the top **25 ideas out of 750+ submissions** for **Bio heal-** an AI-driven healthcare solution focused on assisting in disease prediction, health monitoring through data analysis and intelligent decision-making.
